

It would seem more profitable to spend money getting rid of the current virus/worm and other illegal interference problem on the Internet than spending the money causing yet more interference with existing with Band Plans and doing nothing to solve the existing problems. It is my oppinion that a solution to the current Internet problems should be attempted with a very high priority rather than opening it up to the whole world to cause even further problems and causing more damage than ever before. It will be far worse than what happened to CB radio in the 60's, 70's and 80's. Do you not see what will happen? I am a member of Phi Theta Kappa Honor Society, as a Visionary. I have told you what will happen. Please do not let us have BPL. People will want to sue the government by saying they have cancer because of it. The Internet will completely loose its ability maintain its sanity. Not to mention that it will interfere with existing radio signals and trashing the radio bands with even more polution than we already have. By the way, are you giving the public their right to vote on this or are you just forcing it on us?
